Projects

2023/04 – 2024/01

MapMyStudy [↗](#)

Developer

Built a study-abroad project for a Canadian client, Map My Study, using HTML, CSS, JavaScript, and Bootstrap. Designed and developed an interactive, user-friendly platform to help students explore international study opportunities, access essential resources, and connect with institutions worldwide. Implemented responsive design, intuitive navigation, and visually appealing layouts to enhance user engagement and provide seamless access across devices.

2022/01 – 2023/03

MyContents [↗](#)

Developer

Designed and developed the backend for MyContents, a ringtone platform catering to Indonesian users. Utilized PHP to manage & maintain functionalities, ensuring seamless content categorization and delivery—enhanced system performance, improving response times for user interactions on MyContents [↗](#) .

2021/05 – 2021/11

LDT Technology Website [↗](#)

Developer

Developed and implemented web and software features for LDT Technology using React.js, ensuring responsive and interactive user interfaces. Optimized performance and enhanced cross-browser compatibility for seamless functionality. Contributed to platform improvements at LDT Technology [↗](#) .

2020/08 – 2021/04

O2Lenses [↗](#)

Developer

Built a study-abroad project for a Canadian client, Map My Study, using HTML, CSS, JavaScript, and Bootstrap. Designed and developed an interactive, user-friendly platform to help students explore international study opportunities, access essential resources, and connect with institutions worldwide. Implemented responsive design, intuitive navigation, and visually appealing layouts to enhance user engagement and provide seamless access across devices.
